Health
Safety
Environment

Our HSE Plan

We believe that SAFETY is a conceptual revolution. A fundamental transformation of the way people learn, do business, relate to each other and seek fulfillment in life and work. The accidents represent a social loss of great magnitude in the form of pain, loss of earning capacity and cost due to disturbance on economic efficiency. Safety is our basic tool to gain freedom from accidents and preserving lives and keeping families together.

voizkoom pays every importance to health and safety from the humanitarian, economic, and legal viewpoint. It is the policy of our company to provide and maintain safe and healthy working conditions and to follow operating practices that safeguard all employees, which will result in efficient operations. In line with this policy, management of the organization is committed to the protection of its human resources, properties and the environment.

To attain our objective of ZERO ACCIDENTS, Vigorous efforts are extended to accident prevention in all possible ways and implications. We consider the same as an important element in our construction process under the direct responsibility of the project execution team.

Our Loss Control Program is educative, creates awareness, and trains employees on how to take adequate precautionary measures while handling hazardous activities. It also addresses some of the administrative methods we have established for the achievement of safe and healthy working environment.

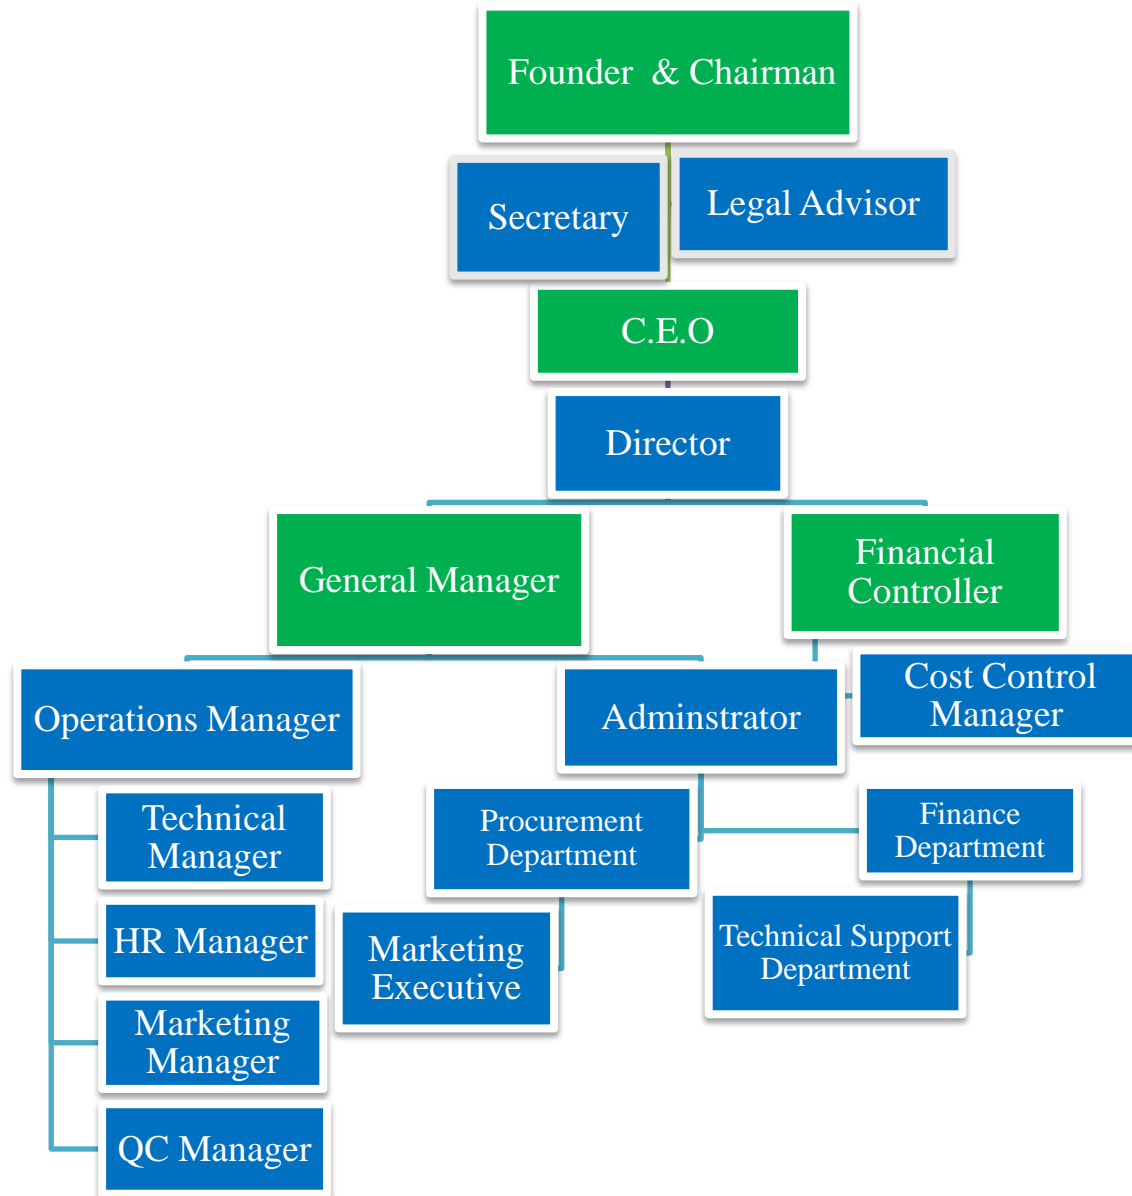

Safety and Loss Prevention Department is headed by a Manager along with trained professionals, who in turn train all our safety conscious employees of voizkoom.

Environmental back bone setup with experts in the conduct of impact assessments familiar with the Health, Safety and Environmental Management System (HSEMS) to promote employee health, safety and a quality environment is a best resource of voizkoom.
